

### Hooker Road Riverbank Restoration

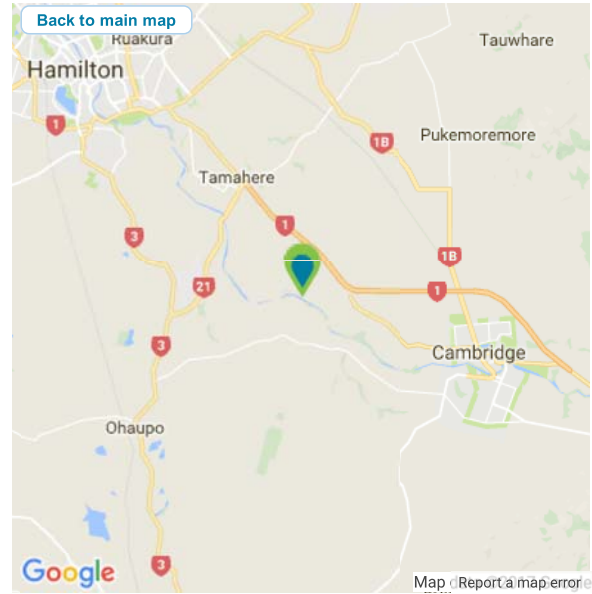

Rob Waddell  
021 800 996

This project will restore a 1.2 kilometre stretch of the Waikato River bank near Mystery Creek.

This project involves restoring a 1.2km long section of river bank which is an 8.5ha area of Waikato River bank (spanning six properties) to a native plant dominated ecosystem. The site is currently a mixture of native vegetation, pine trees, un-grazed pasture and weed species such as wandering jew, gorse and blackberry. WRA 15-030.
