Restoration of 10 hectares of wetland on Fish and Game Council land near Tuakau

This project involves restoration of approximately 10.4 hectares of wetland on Fish and Game Council land near Tuakau. At its closest point, this wetland is just 300 metres from the Waikato River.

This restoration will, in total, produce approximately 10.4 hectares of ideal summer whitebait habitat for adult kookopu and kooaro and also become a prime habitat for both eels and, to a lesser extent, waterfowl.

This project received funding from the Waikato River Authority (WRA 11-007)
