To develop a comprehensive Waikato-Tainui Environmental Management Plan

The development of a comprehensive Waikato-Tainui Environmental Management Plan (EMP) is a priority action for WTTKI and WRRT. This project seeks to deliver a comprehensive iwi management plan that expresses the Waikato-Tainui perspectives, values and aspirations in relation to environmental management and provides clear, consistent policies and statements to help achieve those aspirations.

Waikato-Tainui firmly believe that this project will make a significant contribution toward achieving the object of the Waikato River Clean Up Trust: to restore and protect the health and well-being of the Waikato River for future generations.

This project received funding from the Waikato Rver Authority (WRA 11-112)
