To continue to restore and enhance the Kimihia catchment

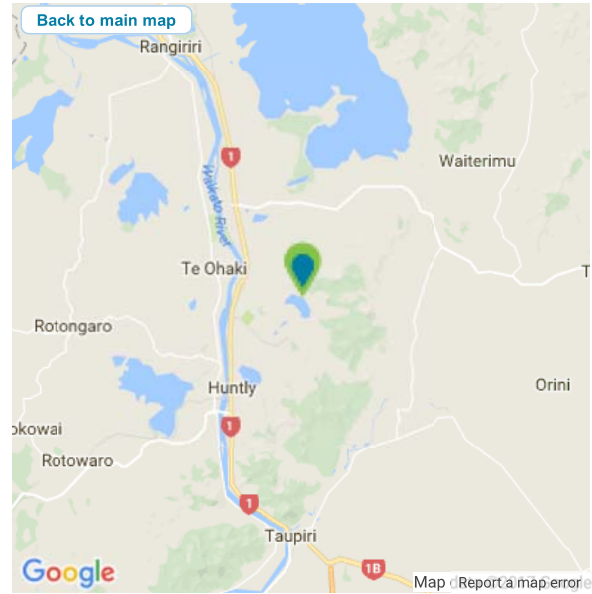

The Kimihia Restoration Project is a multi-party project aimed restoring and enhancing the Kimihia Stream catchment, including Lake Kimihia, by catchment management, riparian and other planting, pest fish management and modifications to drainage as appropriate, to improve the quality of water entering the Waikato River from Kimihia Stream.

Parties involved besides Solid Energy and Waahi Whanui include New Zealand Transport Agency, University of Waikato, and staff from Waikato District and Waikato Regional Councils.

Key activities include completion of riparian fencing and planting of wetland along Kimihia Stream near Fisher Road, and improving bunding and protection of Kimihia wetland.

This project is funded by the Waikato River Authority (WRA 12-002)
